Product Information

Flow Switch FF-...GR

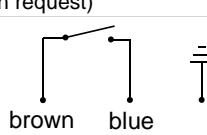

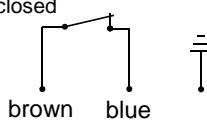

- Adjusted switching value
- Highly reproducible
- Insensitive to dirt

Characteristics

The volume flow raises a piston (fitted with a magnet) out from a valve seat against a spring force. The piston actuates a hermetically separated reed switch.

Technical data

Switch	reed switch	
Nominal width	DN 8..40 (DN 50..80 available on request)	
Process connection	female thread G 1/4 .. G 1 1/4	
Adjustment range	0.4..90 l/min	for details see table "Ranges"
Q_{max.}	to 150 l/min	
Tolerance	$\pm 3\%$ of the switching value, minimum ± 0.3 l/min	
Pressure resistance	G 1/4..G 1/2	- PN 200 bar
	G 3/4..G 1	- PN 25 bar
	G 1 1/4..G 1 1/2	- PN 16 bar
Medium temperature	DN 8..15	-20..+110 °C
	\geq DN 20	-20..+ 90 °C
Ambient temperature	-20..+70 °C	
Media	water (oils available on request)	
Wiring	normally open (n.o.) no. 0.212  optionally, normally closed no. 0.214 (not all adjustment ranges are possible, please enquire) 	
Switching voltage	max. 230 V AC	
Switching current	max. 1 A	
Switching capacity	max. 50 VA	
Protection class	1 - PE connection	
Ingress protection	IP 65	
Electrical connection	cable 1.5 m	

Sensors and Instrumentation

Materials medium-contact	Rg 5 nickelated, 1.4310, CW614N nickelated, NBR, hard ferrite
Non-medium-contact materials	PA, PVC
Weight	see table "Dimensions and weights"
Installation location	Standard: horizontal inwards flow; switching head not recommended underneath; other installation positions are possible; the installation position affects the switching point and range.

Ranges

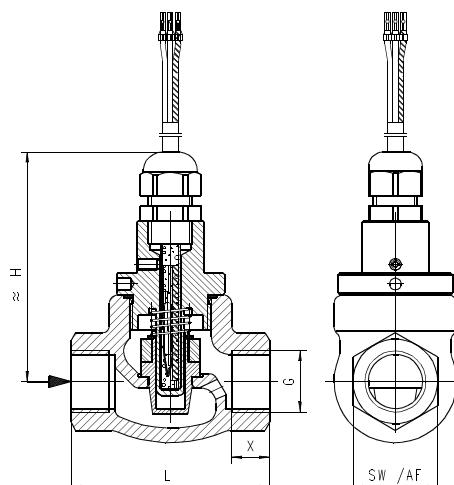

Details in the table correspond to horizontal inwards flow with decreasing flow rate.

Product Information

Handling and operation

- Include straight calming section of 5 x DN in inlet and outlet
- If the media are dirty, install a filter (use magnetic filter for ferritic components).
- It must be ensured that the values given for voltage, current, and power are not exceeded.
- When switched on, a load must be connected in series. The electrical details apply to ohmic loads. Capacitive, inductive and lamp loads must be operated using a protective circuit.

Product Information

Flow Switch FM-...GR

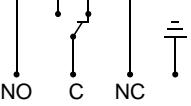

- Adjusted switching value
- Highly reproducible
- Insensitive to dirt
- High switching power

Characteristics

The volume flow raises a piston (fitted with a magnet) out from a valve seat against a spring force. The piston uses a magnetic coupling to actuate a hermetically separated micro switch.

Technical data

Switch	micro switch
Nominal width	DN 8..15 (DN 20..80 available on request)

Product Information

Flow Indicator MP-...GR

- No electrical supply required
- In sensitive to dirt
- Also for dark or dirty media
- Rotatable scale, easy to read
- No glass parts under load from pressure or media

Characteristics

The volume flow raises a disc against a spring force. Via a tappet, the disc actuates a magnet which is coupled to a hermetically sealed display ring.

Product Information

Flow switch Novafix PD-...MH

- Highly reproducible
- Insensitive to dirt
- Precise setting of the switching valve by means of rotation

Characteristics

Mechanical flow switch, for fluid media, with no-contact triggering of an adjustable Reed contact.
Robust construction in PVC material.

Technical data

Switch	Microswitch
Nominal width	DN 15 – 50
Process connection	Glue socket
Adjustment range	2 – 200 l/min
Q_{max.}	up to 250 l/min
Hysteresis	Depending on the switching value, minimum 1 l/min
Tolerance	± 5 % of full scale value
Pressure resistance	PN 10 bar
Medium temperature	-20 – +60 °C
Ambient temperature	-20 – +60 °C
Media	Water (oils and gases available on request)
Wiring	Transformer No. 0.213
Switching voltage	max. 250 V AC
Switching current	max. 1.5 A
Switch performance	max. 50 VA
Protection class	2 - Safety insulation
Ingress protection	IP 44
Connection	Plug DIN 43650-A / ISO 4400
Materials medium-contact	1.4310, Delta Tone/sial coated, PVC, Viton, hard ferrite
Non-medium-contact materials	ABS

Sensors and Instrumentation

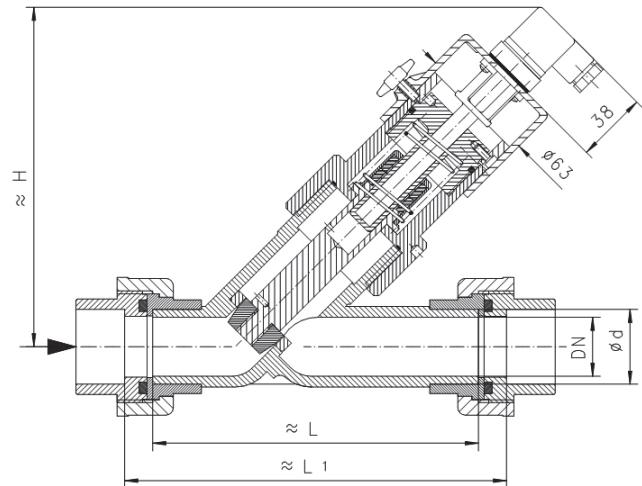

Weight	see table "Dimensions and weights"
Installation location	Standard: horizontal inwards flow; switching head not recommended underneath; other installation positions are possible; the installation position affects the switching point and range.

Ranges

The adjustment range is suitable for horizontally decreasing flows.

Product Information

Flow Switch / Indicator TX-...FT

- Monitor and display
- Media temperature up to 350 °C
- Highly reproducible
- In sensitive to dirt
- DIN flange housing

Characteristics

The volume flow raises a disc unit with tappet rod and magnet against a spring force. This actuates a hermetically separated micro switch and a hermetically separated display

Technical data

Switch	micro switch	
Nominal width	DN 15..200	
Process connection	flange DIN 2545 PN 40	
Switching range	2..1250 l/min	for details see table "Ranges"
Q_{max.}	to 4,000 l/min	
Tolerance	±5 % of full scale value	
Pressure resistance	PN 40 bar /20°C fore more informations see "Handling and operation"	
Medium temperature	-20..+350 °C	
Ambient temperature	-20..+70 °C	
Media	water (oils available on request)	
Wiring	changeover no. 0.213	
Switching voltage	max. 250 V AC	
Switching current	max. 6 A	
Protection class	2 - safety insulation	
Ingress protection	IP 44	
Connection	plug DIN 43650-A / ISO 4400 or cable screw gland with 2.5 m cable	
Materials medium-contact	cast steel GGS 25, 1.4571, 1.4301, 1.4305, 1.4310, Sigraflex V20011Z3I, hard ferrite, FKM	
Non-medium-contact materials	Acrylic (XT), PA, POM, CW614N nickelled, steel coated with Rilsan	

Sensors and Instrumentation

Weight	see table "Dimensions and weights"
Installation location	Standard: horizontal inwards flow; switching head not recommended underneath; other installation positions are possible; the installation position affects the switching point and display range.

Ranges

Details in the table correspond to horizontal inwards flow with decreasing flow rate.

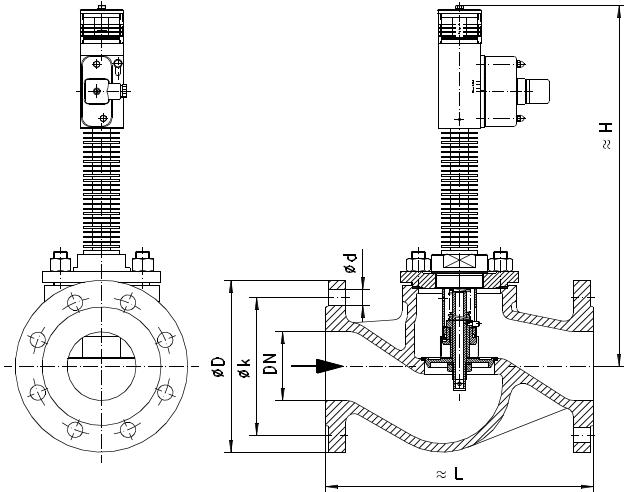

Nominal width	Switching range l/min H ₂ O	Q_{max.} recommended	Type	
			2 - 8	TX-015FT0008
DN 15	4 - 20	30	TX-015FT0020	
			TX-020FT0020

200	TX-200FT	580	600	375	320	12 x 30	154.0

Product Information

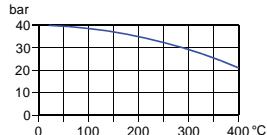

- Overall length DIN 3202, range F1
- Flange DIN 2545 PN 40
- Flange size DIN 2501 PN 40
- Sealing bar DIN 2526 form C

Handling and operation

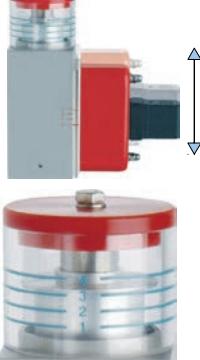

Note

- Include straight calming section of $5 \times DN$ in inlet and outlet
- Include a filter if the media are dirty (use magnetic filter for ferritic components).
- It must be ensured that the values given for voltage, current, and power are not exceeded.
- When switched on, a load must be connected in series.
- The electrical details apply to ohmic loads. Capacitive and inductive loads must be operated using a protective circuit.
- Stability to pressure depends on operating temperature

Adjustment

Loosen screw slightly, push the switching head into the desired position, and then retighten the screw.

Display

- The display is rotatable.

K	cable screw gland with 2.5 m cable
---	------------------------------------

Options

- DIN 43650-A plug
- Signal lamp red or red/green in the plug DIN 43650-A
- Other signal lamp
- Stainless steel housing
- Switching ranges for oil
- Special values

Ordering information

- Specify direction of flow, medium, and switching range.
- For oils. State viscosity, temperature and designation (e.g. ISO VG 68) (enquire about switching range).

Product Information

Flow Meter TZ1-...GK

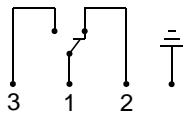

- Large analog display
- Monitor and display
- Simple adjustment by means of drag indicator
- InSensitive to dirt
- Short installation length

Characteristics

The volume flow raises a disc unit (fitted with a magnet) out from a valve seat against a spring force. The magnet actuates the display movement by means of a magnetic coupling.

Technical data

Switch	optionally micro switch	
Nominal width	DN 15.50	
Process connection	female thread G 1/2..G 2	
Metering range	2..250 l/min	for details see table "Ranges"
Q_{max.}	to 250 l/min	
Tolerance	±3 % of full scale value	
Pressure resistance	PN 100 bar	
Medium temperature	-20..+90 °C	
Ambient temperature	-20..+70 °C	
Media	water (oils, gases and aggressive media available on request)	
Wiring	changeover no. 0.342	
Switching voltage	max. 250 V AC	
Switching current	max. 5 A	
Protection class	2 - safety insulation	
Ingress protection	IP 65	
Electrical connection	plug DIN 43650-A / ISO 4400	
Materials medium-contact	1.4305, 1.4571, 1.4310, NBR, hard ferrite PTFE-coated	
Non-medium-contact materials	CW614N chromed, steel chromed, acrylic, FKM	
Weight	see table "Dimensions and weights"	

Sensors and Instrumentation

Installation location

Standard: horizontal inwards flow; display downwards not recommended; other installation positions are possible; the installation position affects the switching point and display range.

Ranges

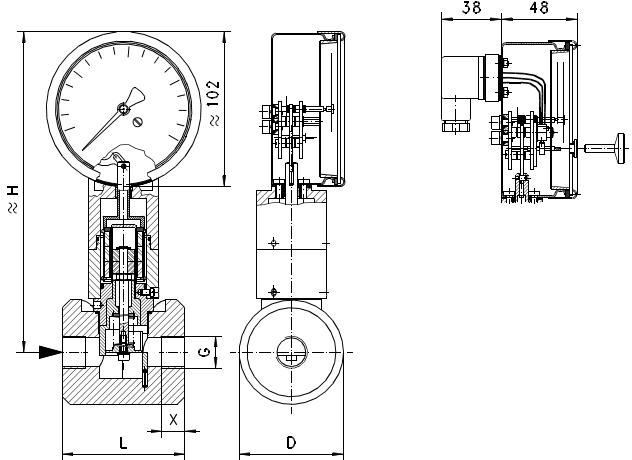

Details in the table correspond to horizontal inwards flow with increasing flow rate.

Product Information

Handling and operation

Note

- Include straight calming section of 5 x DN in inlet and outlet
- Include a filter if the media are dirty (use magnetic filter for ferritic components).
- It must be ensured that the values given for voltage, current, and power are not exceeded.
- When switched on, a load must be connected in series.
- The electrical details apply to ohmic loads. Capacitive and inductive loads must be operated using a protective circuit.

Adjustment

The micro switch (optional) is adjusted by means of the knurled adjusting screw provided. The screw allows the drag indicator to be set to the desired switching value. The value displayed corresponds to a switching point for a decreasing flow rate.
